

MOHAMED ESAMELDIN ELSAID

Munich, 80993 Germany | +49 (0) 171 1733 583 | mohesam84@yahoo.com | [LINKEDIN](#)

Independent Board Advisor | Technology Governance Advisor | Digital Infrastructure Board Member

Executive Overview

Mohamed Esameldin Elsaid is a senior technology executive with extensive experience advising global enterprises on artificial intelligence, cloud computing, enterprise infrastructure, and digital transformation. Throughout his leadership career at Intel and Dell Technologies, he has partnered with executive teams to guide technology investments, manage enterprise risk, and align innovation with long-term business strategy. His expertise combines commercial insight, governance awareness, and international leadership, making him well-suited for board and advisory responsibilities.

Board Readiness

Assessment: Board Ready – Technology, AI & Digital Transformation

Mohamed demonstrates the strategic judgement, governance mindset, and executive advisory capabilities expected of a Non-Executive Director supporting organizations undergoing digital transformation. Although his experience has been gained primarily through executive leadership rather than formal board appointments, he is well prepared to contribute to technology oversight, innovation, enterprise risk, and strategic decision-making.

Core Governance Strengths

- Technology & Digital Governance
- AI Strategy & Oversight
- Enterprise Risk Management
- Digital Transformation
- Cloud & Infrastructure Strategy
- Innovation & Emerging Technologies
- Executive Stakeholder Engagement
- Technology Investment Oversight
- Operational Resilience
- International Business Leadership

Leadership Assessment

Mohamed has consistently advised executive leadership on complex technology initiatives, enterprise modernization, AI infrastructure, and cloud strategy while balancing innovation with operational resilience and business objectives. His experience demonstrates the ability to evaluate long-term technology investments, mitigate strategic risks, and support sustainable organizational growth across international markets.

Board Value Proposition

Mohamed would provide immediate value to boards seeking expertise in:

- Artificial Intelligence Governance
- Digital Transformation
- Enterprise Technology Strategy
- Cloud & Infrastructure Modernization
- Cybersecurity & Technology Risk
- Innovation Governance
- Data Centre & Enterprise Architecture
- Technology Investment Planning

Development Opportunities

To strengthen his public company board profile, Mohamed would benefit from gaining formal Non-Executive Director experience and expanding exposure to board-level financial oversight, executive remuneration, succession planning, and governance committee responsibilities.

Overall Assessment

Mohamed Esameldin Elsaid possesses the strategic perspective, executive credibility, and governance awareness required to support boards navigating technology-driven transformation. His combination of enterprise advisory experience, AI expertise, international leadership, research credentials, and intellectual property development positions him as a strong candidate for Technology, Innovation, Digital Transformation, and Risk Committee appointments across technology-led, industrial, infrastructure, healthcare, telecommunications, and private equity-backed organizations.
